GREEN TIPS FOR A SUSTAINABLE VISIT TO PTUJ

DRINK TAP WATER.

- ✓ Naturally clean and safe
- ✓ Tasty and refreshing
- ✓ Plastic-free – environmentally friendly

Ptuj's water comes from clean natural sources and is regularly tested according to the strictest standards. By choosing a glass of tap water, you help protect nature, reduce plastic waste, and support sustainable tourism.

👉 Choose an environmentally friendly way to stay refreshed.

SEPARATE YOUR WASTE.

- ✓ Paper and cardboard – in the red bin
- ✓ Plastic, cans and beverage cartons – in the yellow bin
- ✓ Glass – in the white bin
- ✓ Biodegradable waste – in the brown bin
- ✓ Other waste – in the black bin

Separating waste helps reduce the amount of rubbish sent to landfill, enables the recycling of raw materials, and keeps the environment clean.

👉 By sorting waste properly, we are working together for Ptuj's sustainable future.

SAVE ENERGY.

- 💡 Turn off the lights when there is enough daylight.
- ❄️ Use the air conditioner only when necessary.
- 🔌 Unplug devices when they are not in use.
- 👤 Choose the stairs instead of the lift.
- 🌍 By using energy responsibly, you reduce CO₂ emissions and help protect the environment.

👉 Your small step = a big contribution to a cleaner Ptuj.
